

Bringing the science of today to the medicine of tomorrow

Introducing an innovative new benefit program!

Through Genomic Life, you will have access to proactive genetic tests that will unlock insights into your inherited risks for cancer and other diseases. When you sign-up, the Genomic Life Platform provides you with access to clinically relevant genetic testing and specialized services, including:

Essential Genomics

Genetic Health Screen

An accurate, medical-grade DNA test that analyzes genes to identify a predisposition to developing hereditary cancers, cardiovascular diseases, and additional conditions.

Pharmacogenomics (PGx)

Helps uncover how an individual metabolizes and responds to medications. This knowledge helps reduce an adverse drug reaction and increase drug response.

Carrier Screening

Identifies a potential risk of having a child affected by a recessive genetic disease.

Precision Cancer Care

Should you or your family member face a cancer diagnosis, our cancer services team will provide personalized support throughout the course of treatment, including such steps as:

- Personalize oncology navigation
- Comprehensive genomic profiling
- Peer-to-peer physician consult
- Expert pathology review
- Much more

This exciting new benefit is being offered to you by your employer!

Why genomics matter

For the first time in history, people can prevent disease before it happens, diagnose disease more accurately and treat patients better based on their specific genetic makeup.

Prevention

Identify risks prior to or early in disease progression.

Precision cancer care

Get treated based on your unique molecular causes of disease.

Diagnosis

More accurately diagnose disease to improve outcomes and lower costs.

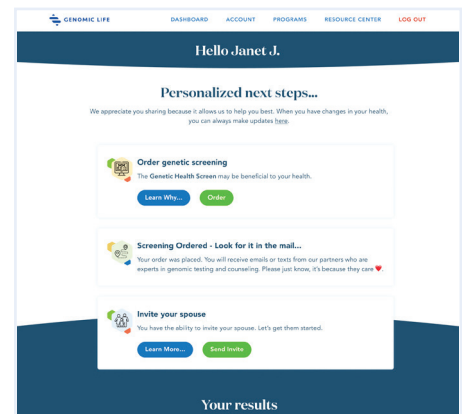

Pharmacogenomics (PGx)

Optimize the right drug and right dose based on your unique genetic makeup.

Use the Genomic Life Platform to enhance your healthcare journey

We provide an all-inclusive membership, so that you can focus on life.

After your program effective date, you will receive a Welcome Email with access to your account and genetic testing.

1 in 6

Roughly 1 in 6 people carry a genetic change that increases their risk for diseases that have medical interventions available¹

“The expertise, dedication, and support from Jess at Genomic Life made me go from drinking from a fire hose, feeling overwhelmed and lost to feeling confident, blessed, and in control of my life again. They are truly helping me battle this disease.” – Michael Murray, Member
